# MAG Regional Profile

---

## INTRODUCTION

The Maricopa Association of Governments (MAG) is the designated Metropolitan Planning Organization (MPO) for transportation planning for the Maricopa region. MAG is also the designated Air Quality Planning Agency for the region. The MAG membership consists of the 25 incorporated cities and towns within Maricopa County, the Gila River Indian Community, the Salt River Pima-Maricopa Indian Community, Fort McDowell Yavapai Nation, Maricopa County, the Arizona Department of Transportation and the Citizens Transportation Oversight Committee.

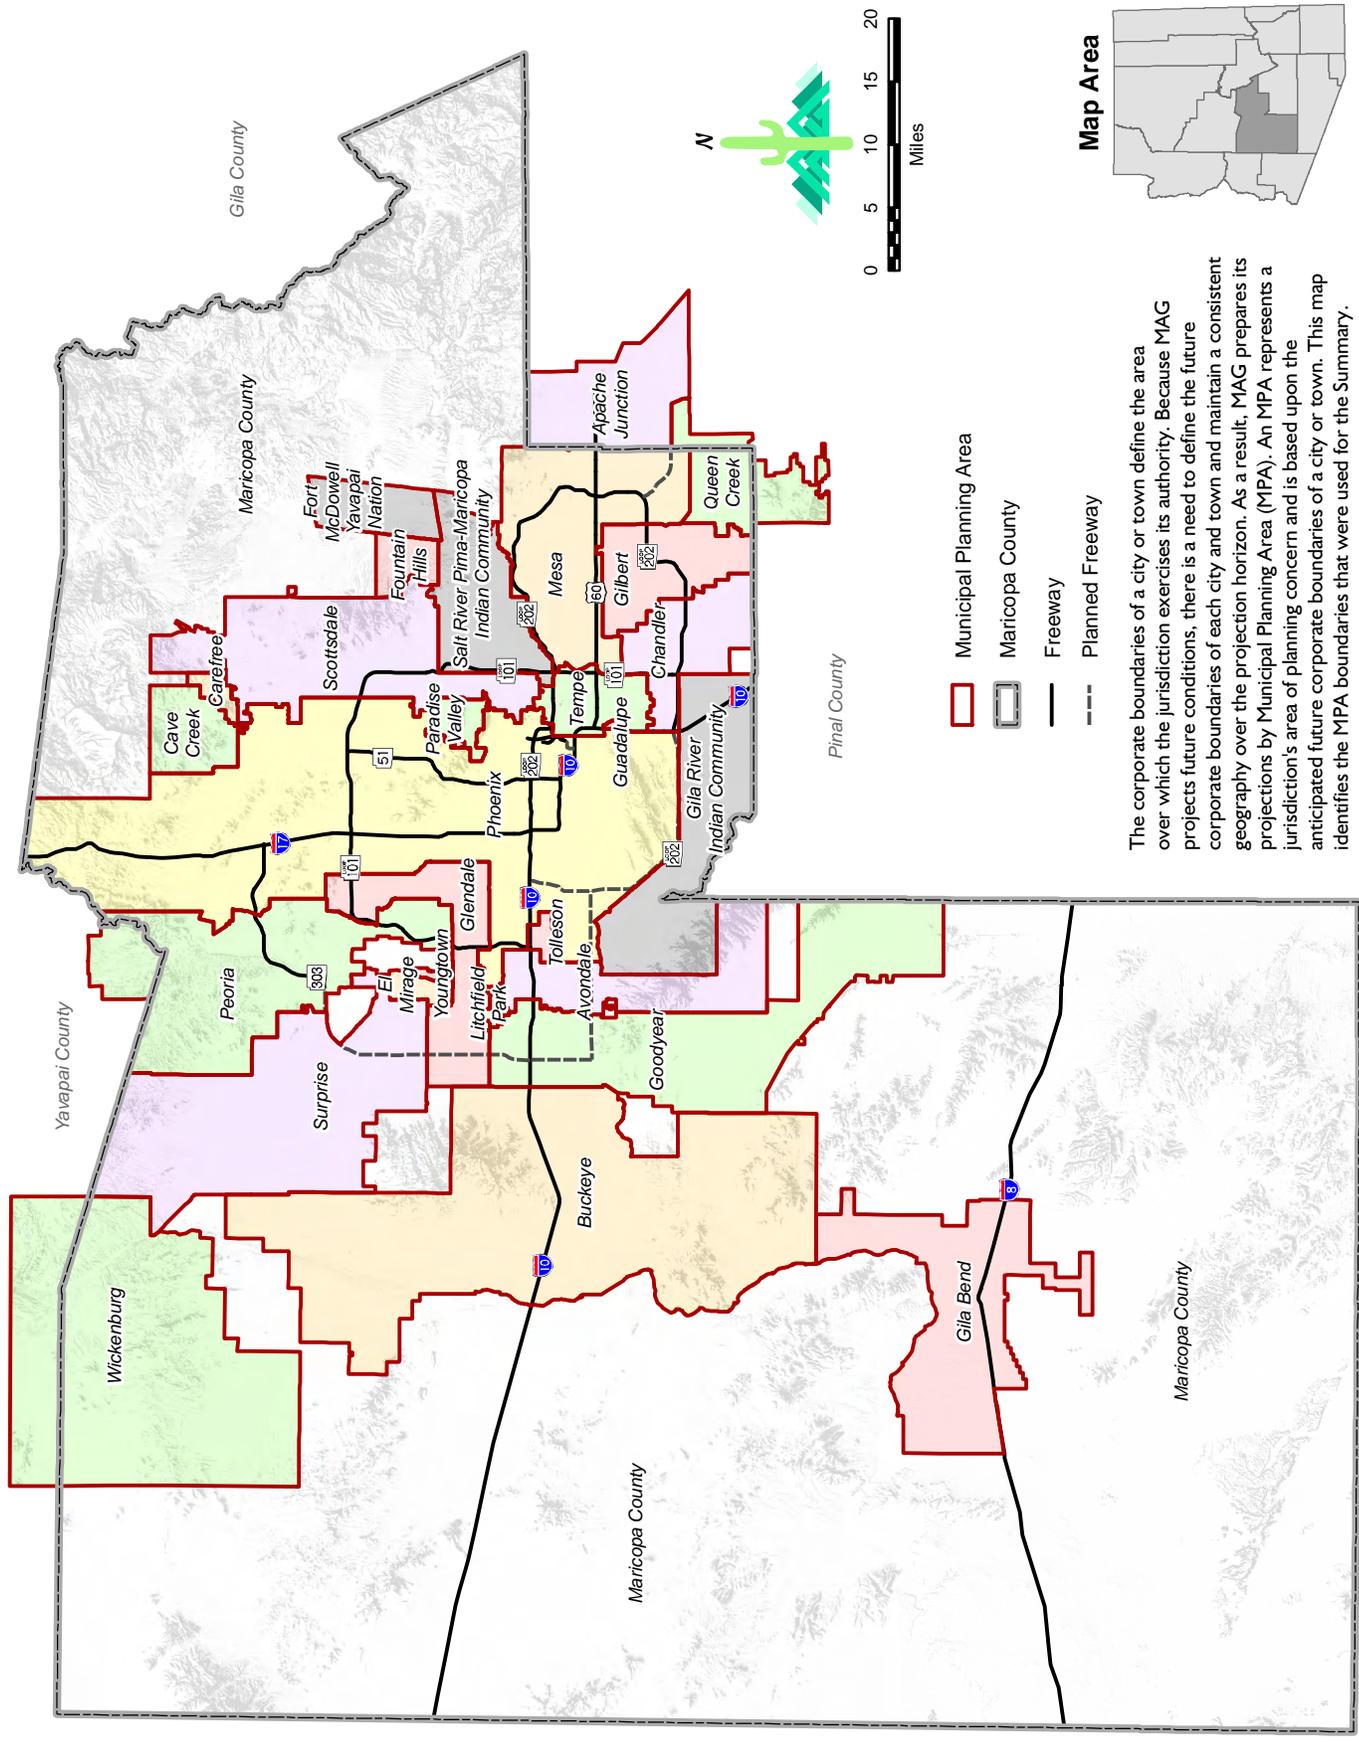

Arizona Executive Order 2011-04 requires the preparation of an official Arizona set of resident population projections. The Executive Order mandates that the Arizona Department of Administration (ADOA) prepare the state and county resident population projections, but authorizes Councils of Governments to prepare projections below the county level that are consistent with the County control totals developed by ADOA. The Maricopa Association of Governments has been preparing subregional population projections since the mid 1970s.

Socioeconomic projections are crucial to sound regional planning. Projections of population and employment are used as inputs to forecast vehicle trips and air quality emissions. They also are used to develop the MAG Transportation Improvement Program and Regional Transportation Plan, help determine the need for human services, plan for water quality, and carry out other regional planning efforts.

The MAG 2012 Socioeconomic Projections are a collaborative effort between MAG staff and the staff of its member agencies. The projections have been developed over an 18 month period during which time all data inputs for the projections have been reviewed and modified based on comments received. The methodologies used to prepare the projections have been reviewed and approved by the MAG Population Technical Advisory Committee.

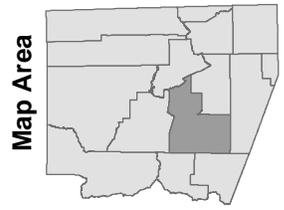

This document provides socioeconomic information for historic and projected dates focusing upon the years 2010, 2020, 2030 and 2040 for Maricopa County and Municipal Planning Areas (MPAs). The document also includes socioeconomic profiles of each MPA. These profiles summarize and interpret information that plays a vital role in analyzing the future of each city and town: population, employment, housing and type and availability of land for future commercial and residential development.

The complete drafts of the MAG 2012 Socioeconomic Projections, including projections, socioeconomic profiles and documentation, are available on the MAG website at: <http://www.azmag.gov>.

- Planned Freeway

The corporate boundaries of a city or town define the area over which the jurisdiction exercises its authority. Because MAG projects future conditions, there is a need to define the future corporate boundaries of each city and town and maintain a consistent geography over the projection horizon. As a result, MAG prepares its projections by Municipal Planning Area (MPA). An MPA represents a jurisdiction's area of planning concern and is based upon the anticipated future corporate boundaries of a city or town. This map identifies the MPA boundaries that were used for the Summary.

Native Hawaiian and Other Pacific Islander.....	24	0.2			
Some other race.....	256	2.2			

Notes:  
 (X) Not applicable; [1] Other Asian alone, or two or more Asian categories; [2] Other Pacific Islander alone, or two or more Native Hawaiian and Other Pacific Islander categories; [3] In combination with one or more of the other races listed. The six numbers may add to more than the total population, and the six percentages may add to more than 100 percent because individuals may report more than one race; [4] This category is composed of people whose origins are from the Dominican Republic, Spain, and Spanish-speaking Central or South American countries. It also includes general origin responses such as "Latino" or "Hispanic." [5] "Spouse" represents spouse of the householder. It does not reflect all spouses in a household. Responses of "same-sex spouse" were edited during processing to "unmarried partner." [6] "Family households" consist of a householder and one or more other people related to the householder by birth, marriage, or adoption. They do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same-sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption. Same-sex couple households with no relatives of the householder present are tabulated in nonfamily households. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder. [7] The homeowner vacancy rate is the proportion of the homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, vacant units that are "for sale only," and vacant units that have been sold but not yet occupied; and then multiplying by 100. [8] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units "for rent" by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

## **NOTES AND CAVEATS FOR 2013 PROJECTIONS**

1. The projections by Municipal Planning Area (MPA) and Regional Analysis Zone (RAZ) were prepared to be consistent with the April 1, 2010 Census and have been prepared for July 1<sup>st</sup> of the base year 2010 and projected for July 1<sup>st</sup> of 2020, 2030, and 2040.
2. The 2010 housing and population base was developed by aggregating Census 2010 data to Traffic Analysis Zones. Census place mismatches were corrected in this process and are reflected in the Base 2010 MPA and RAZ numbers.
3. The population projections are for resident population only and do not include nonresident seasonal or transient population.
4. The projections are required to use the latest Census as the base. The 2010 Census data were released in July 2011. Subsequent to the release, the Arizona Department of Administration, Office of Employment and Population Statistics, prepared a new set of Maricopa County projections consistent with the 2010 Decennial Census. These County projections were recommended for approval by the MAG Population Technical Advisory Committee (POPTAC) in October 2012 and the Management Committee in November 2012. The projections were approved by the Regional Council in December 2012.
5. The MAG socioeconomic projections by MPA and RAZ were recommended for approval by the MAG POPTAC on May 28, 2013 and by the MAG Management Committee on June 12, 2013. The projections were approved by MAG Regional Council on June 19, 2013.
6. The projections include the Maricopa County portion of Apache Junction, Gila River Indian Community, Peoria, Queen Creek and Wickenburg only.
7. The projections were based upon the latest version of each member agency's land use plan. These plans are subject to change.
8. The databases and assumptions upon which the projections are based have been reviewed by MAG member agencies, revised by MAG staff based on input received and approved by members of the MAG POPTAC.
9. The projections are based upon previous review and local insight by members of the MAG POPTAC.
10. The "other" employment category includes work-at-home, construction employment, and non-site based employment. Because construction and non-site based employment follows development, employment projections may show declines in future years.
11. The projections should be used with caution. They are subject to change as a result of fluctuation in economic and development conditions, local development policies and updated data.
